Subject: The let em oof free deal

I wish to express my concerns for the reported deal between Microsoft and States and Gov.

It is the type of deal that lawyers such as those of microsoft hire can work around on a daily basis without even a hitch in their daily operations as they intended them to be anyway.

This deal does nothing to remedy the fact they have stolen from the public in many ways including monetary and products that could have been, but were squashed by this unruly giant.

On the subject of fines, I certainly think a very large fine would make sense, considering their financial status which is also coming under eyes.

I certainly hope that the gov. would rejoin the nine states that have held out and put some controls on this runaway, unruly, money hungry, corporation.
